Kershner's The Advanced Pilot's Flight Manual has long been a standard reference for pilots transitioning to advanced models and types and preparing for the commercial pilot knowledge and flight tests. This book bridges the gap between theory and practical application, covering the fundamentals of airplane aerodynamics and aircraft performance. Rules of thumb are used throughout as a means of presenting a clearer picture of the recommended performance parameters and increasing understanding of the variable factors that affect aircraft operations such as altitude and temperature. Knowledge of these thumb rules will enable pilots to maximize performance when operating faster aircraft and at higher altitudes. Chapters are dedicated to airplane performance and stability for pilots checking out in advanced models and types, emergencies and unusual situations, advanced navigation, high altitude operations, preparing for the commercial knowledge and practical tests.

Everything a student pilot needs to gain aviation certification is included in this handbook for student pilots.

The Commercial License Preparation Manual from Kershner's The Flight Manuals Series

This is a ground school textbook, maneuvers manual, and syllabus all rolled into one, providing a step-by-step comprehensive course for student pilots working towards a private or sport pilot certificate. This authoritative volume from the legendary flight instructor William K. Kershner, edited by William C. Kershner, presents a wealth of practical information while encouraging student pilot decision-making. The fundamentals of flying are clearly described in a methodical yet informal manner that a student can easily absorb. It includes detailed references to maneuvers and procedures and is fully illustrated with the author's own drawings. This manual covers all you need to know for your first flight: presolo, the post solo, maneuvers, cross country, and night flying. First published in 1960 and updated continuously since then, this 12th edition ensures you will be prepared for the classroom, tarmac, and the cockpit. It is a gathering of material used in preflight and postflight briefings and in flight instruction provided by one of the greatest flight instructors of our time. It also includes a synopsis of what to expect for your FAA knowledge exam and checkride. This book is not intended to only help you get past the exam and checkride; it also has the essential information for use in the day-to-day process of flying airplanes.

An excellent instructor resource for information about the problems students and pilots encounter in flight training, The Flight Instructor's Manual is an invaluable reference for flight instructor applicants and serves as an indispensable guide for both new and experienced instructors. CFIs are organized so each chapter can be used as a stand-alone reference for a particular phase of instruction, allowing it to serve as a how-to-teach guide on topics including fundamentals of flight instruction, CFI presolo instruction, first solo to the private certificate, advanced VFR instruction, introduction to aerobatic instruction, and instrument instruction. The book also features a comprehensive spin syllabus, material on multi-engine airplanes, instructing international students, teaching ground school, and setting up tests, with teaching tips on fundamentals of instruction, CFI presolo, first solo to the private
